HY-BOR

What is Hy-Bor?
 HYBOR is a state-of-the-art material made from a combination of carbon and boron fibres. The fibres interact structurally to give the material exceptional properties. By adjusting the spacing of the boron fibres in the matrix, the performance characteristics can be tailored to how the material needs to perform as well as maximising its compressional strength.

What is compressional strength?
 When a material resists deforming or failing under compression, it is said to have good compressional strength. When a tennis ball impacts with a racquet, both tensile and compressional loads are applied to the structure. Carbon fibres resist the tensile load, while the boron fibres resist the compressional forces. Together, both types of fibre give the racquet a feeling of stability as it impacts with the ball.

AUXETIC 2.0 Technology
 Feel every shot and be more confident in your game with HEAD Auxetic 2.0 technology. It actively responds, as you use your racquet, giving real-time, super-accurate feedback.

What is Auxetic Tech?
 Auxetic technology uses materials with unique physical properties. These materials expand when a pull force is applied and contract when squeezed. The bigger the force, the bigger the Auxetic reaction.

Where is HYBOR used in the racquet?
 It is located in the centre of the shaft region, maximizing the feeling of stability when playing with the racquet.

What is the benefit of HYBOR?
 HEAD are the first to add this technology to the shaft of their tennis racquets, increasing the perceived stability, power, control and spin of the racquet.

LORENZO
MUSETTI

RACQUET SUB TECHNOLOGIES

SPEED BEAM

The aerodynamic cross-section of the Speed beam maximizes swingspeed and power.

VARIABLE BEAM

The variable beam cross-section perfectly balances the power, control and spin of the racquet.

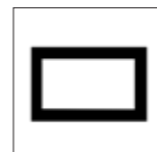

ELLIPTICAL BEAM

The elliptical cross section in the shoulder area creates more flex during impact and enhances feel.

MORPH BEAM

The unique frame construction merges an elongated box beam shaft with a powerful head for the perfect blend of feel and ease on court.

BOX BEAM

The box beam cross-section stabilizes the frame for maximum control.

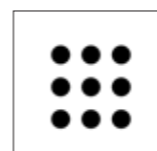

FULL CAP

Full cap for signature impact feel and unmistakable sound.

HALF CAP

Half Cap for improved durability, signature impact feel and unmistakable sound.

DIRECTIONAL DRILLING

Directional drilling combine increased power and sweetspot, delivering a plush impact feel.

SWEET ZONE

The special sweetzone is created through a rounded head shape with the widest string-bed section raised to the tip for modern play.

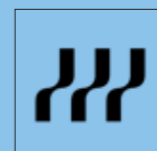

FLEX GROOVE

The deeper flex groove softens the cross section geometry in the shoulder area for enhanced impact feel.

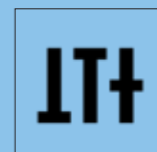

SPEED PATTERN

A special speed string pattern provides with the perfect mix of power under control.

SPIN PATTERN

The open 16/19 string pattern maximizes string snap-back for greater spin generation.

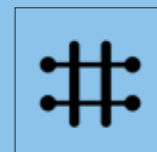

CONTROL PATTERN

A more dense 16/19 string pattern provides the perfect mix of control and power.

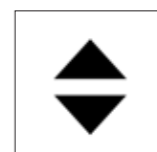

UNI PATTERN

The specially designed uniform string pattern allows for a consistent ball trajectory on every shot for reliable and forgiving play.

AI PATTERN

A data-driven string bed design optimizing performance benefits for each racquet model.

ELONGATED SHAFT

Elongated shaft for classic flex and feel appreciated on Tour since 1987.

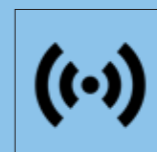

SPIN SHAFT

The spin shaft provides optimized lateral stability, creating higher spin potential

SPIN GROMMETS

Spin grommets allow for greater main string movement in all directions for maximizing power and spin.

SOUND GROMMETS

Sound grommets provide enhanced power via greater string movement and optimize sound and vibrations.

POWER GROMMETS

The enlarged power grommets maximize string movement for increased power.

SQUARED RACQUETS

SQUARED

Why this racquet is amazing and what benefits it has – These are the reasons why you should consider a Squared racquet

POWER²
THE STATE OF THE ART POWER TUBE USING TORAY'S TORAYCA™ T800S CARBON FIBRE TOGETHER WITH AN OPEN 16X18 STRING PATTERN OFFER UNMATCHED EFFORTLESS POWER.

COMFORT²
THE DUAL TUBE ALLOWS THE INTEGRATION OF FOAM TO THE INNER TUBE REDUCING VIBRATIONS TRANSFERRED TO THE PLAYERS ARM.

MANEUVERABILITY²
THE RACQUET HAS A RELATIVELY HIGH WEIGHT PRIMARILY CONCENTRATED IN THE HANDLE MAKING IT OUR MOST MANEUVERABLE RACQUET THAT STILL OFFERS UNMATCHED POWER.

295g
10.4oz

DUAL TUBE CONSTRUCTION

An innovative frame design featuring two integrated tubes that work together to enhance performance. Unlike traditional rackets where the yoke is glued to the main beam, the Dual Tube design connects the main strings directly to the grip, offering a new level of performance and feel.

COMFORT TUBE

Positioned on the inside of the frame and filled with vibration-dampening foam, the Comfort Tube wraps around the yoke to effectively filter out unwanted vibrations—delivering a softer, more comfortable impact.

POWER TUBE

Engineered for maximum stability and optimized for a powerful feel, the Power Tube forms the structural backbone of the racket, ensuring solid response and enhanced energy transfer on every shot.

SQUARED RACQUET

Power², Maneuverability², Comfort²

New and highly innovative, the SQUARED is the most head-light racquet ever from HEAD. Designed for players of all levels, it's made with advanced dual tube technology that creates a perfect fusion of power and comfort, along with a more direct, pleasant impact feel. With the excellent maneuverability, you can swing big with confidence to execute a clean and precise technique. Proven to reduce muscle activity during swings, the SQUARED is particularly suitable for players who are looking for an arm-friendly racquet. It has a super-premium look with a modern, fashionable gray with a hologram effect.

SPEED RACQUETS

SPEED RACQUETS

Precise Power
 Play fast, and with precise power, with the bestselling SPEED series at the center of HEAD's 'Tennis Tour Racquet Compass'. With its perfect blend of power and control, you can do everything with a range endorsed by Jannik Sinner. New Hy-Bor, a material mix used in aerospace, has improved the perceived stability and signature solid impact feel while Auxetic 2.0 technology brings a more connected feel. The new SPEED TOUR, with its smaller head size, offers high precision while the new SPEED MP UL is ultra-light and maneuverable. Metallic colors and a matte finish put a twist on SPEED's iconic black and white design.

SPEED LEGEND RACQUETS

Celebrating Novak Djokovic's Greatness
Inspired by Novak's preferences, the new SPEED LEGEND racquets have an exclusive design celebrating his greatness. Golden, personal touches were inspired by Novak's golden moments on court and because gold is his favorite color while the black, glossy finish was also his personal choice. With the same technologies as the SPEED PRO and SPEED MP, the SPEED LEGEND racquets also offer precise power with a perfect mix of power and control.

TENNIS BAGS

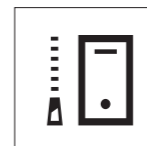

BAG FEATURES

2 WAY CARRY SYSTEM
Pick whether you want to carry the bag over your shoulder or on your back.

ACCESSORY POCKET
Pockets for your accessories.

ACCESSORY ZIPPER POCKET
Pockets for your accessories with a zipper.

CLIMATE CONTROL PLUS
Protect your racquets from extreme temperatures.

RACQUET CAPACITY
The number of racquets that fit into the bag.

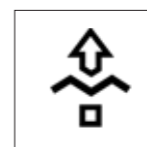

RACQUET COMPARTMENT
The number of racquet compartments the bag has.

SHOE COMPARTMENT
The bag has a separate shoe compartment.

ROLL TOP
The rolltop closure allows adjustable storage capacity and convenient access.

EVA BACK PANEL
The ventilation system ensures optimal comfort during extended use.

TENNIS FOOTWEAR

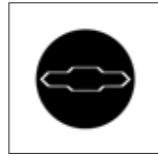

FOOTWEAR TECHNOLOGIES

COMFORT

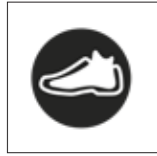

HEAD TRI-NRG

HEAD's complete midsole technology. First, NRG Neutralizes impact in the heel, then it is Rigid in the midfoot for excellent torsional support and finally, Generates energy in the forefoot for faster acceleration.

DYNAFOAM

Created with small air cells, this highly responsive, lightweight midsole offers exceptional comfort and lasts longer than conventional EVA midsoles.

SOCK SUPPORT SYSTEM

Fully integrated elastic sock construction for initial comfort and better support.

HEAD COOLING SYSTEM

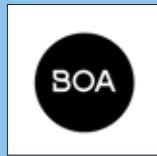

Perforations in the outsole, midsole and sock-liner ensure great ventilation in the bottom of the shoe. Also includes a breathable upper mesh material that provides optimal cooling.

ORTHOLITE®

With its innovative long-term cushioning, and lightweight, highly breathable foam, the OrthoLite® insole enhances comfort on and off the court. The moisture management helps to keep the foot cool, dry and comfortable. On top of that, the insole is machine-washable.

STABILITY

BOA® PERFORMFIT™ WRAP

Delivers micro-adjustable, precision fit engineered to perform in any conditions.

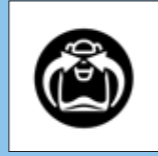

DELTA STRAP

Triangle shaped midfoot straps are integrated into the lacing for best stability and an individual fit.

HEAD HEEL STABILIZER 180°

TPU Brace that wraps around the heel for best fit and support.

HEAD LOCKDOWN STRAP

Midfoot straps integrated into the lacing system keep your foot in place.

HEAD LATERAL CONTROL

HEAD includes additional lateral stability on all our top performance shoes to help avoid rolling over during extreme slides.

HEAD LATERAL CONTROL+

Reinforced sidewall for outstanding lateral stability which also helps to prevent rolling over during more extreme moves.

CORE FRAME

3D TPU frame running throughout the core of the shoe, providing the player with stability from heel to toe. Its unique shape in the heel area allows shearing forces to occur based on where the player lands, enhancing control and performance.

CORE CONTROL

3D TPU sidewall strategically positioned in the lateral forefoot, providing the player with optimal stability during lateral movements.

DURABILITY

SUPERFABRIC®

Extremely abrasion resistant and at the same time really flexible upper material.

HEAD DRIFT DEFENSE

HEAD uses an abrasion resistant rubber or a TPU layer in the Drift Defense technology to protect the toe and medial forefoot area during aggressive toe drags.

HEAD HYBRASION

Non-Marking rubber compound that provides good grip and offers great durability on all surfaces.

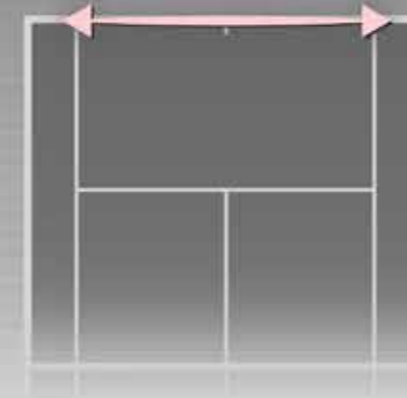

HEAD HYBRASION+

A special rubber compound developed for tennis shoes. Guarantees the best traction for all court surfaces while still providing excellent durability for players who slide a lot.

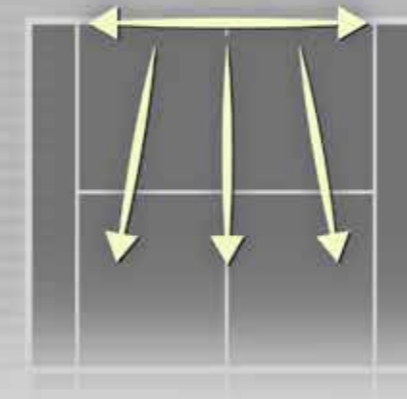

WHAT'S YOUR GAME STYLE?

FIND YOUR BEST FIT

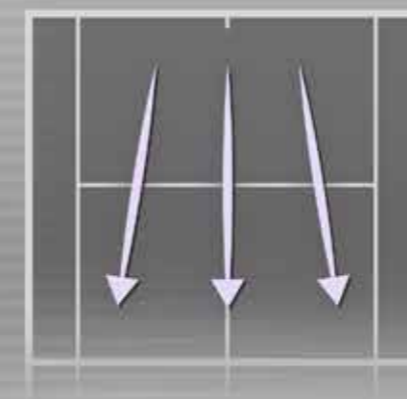

REVOLT

Aggressive baseliners can dominate their opponents in the engineered durability and stability of the REVOLT.

ENDURE

The perfect balance of speed, durability and stability, with ENDURE you can switch effortlessly from baseline play to an all-court game.

SPRINT

The SPRINT, for attacking tournament players looking to move fast across the whole court.

ENDURE PRO BOA

The ENDURE PRO BOA offers the perfect balance of speed, durability and stability. Part of the new ENDURE series that bridges the gap between REVOLT and SPRINT, combining the best of both worlds. With its sleek design and the BOA® PerformFit™ Wrap and Dual Li2 dials which deliver micro-adjustable precision fit, while enhancing the stability, you can switch effortlessly from baseline play to an all-court game.

PRESSURIZERS BALLS

The HEAD Pressurizer is a device designed to restore tennis balls to their peak performance by maintaining their optimal pressure. This innovative tool can accommodate three or four balls in its transparent chamber. Users inflate the chamber using the provided pump until the gauge indicates the ideal pressure has been reached. This system efficiently revives the bounce of tennis balls, extending their usable lifespan. The Pressurizer's compact and lightweight design ensures easy portability from court to court, making it convenient for players on the go.

STRING BASICS

MONOFILAMENT

Monofilament strings have a simple construction, as they are extruded as a single filament that is stretched until the desired diameter or dimension is obtained. They are highly engineered products, due to the special Polyester material and the additives which are combined in complex production processes enhancing specific properties.

The elasticity of these strings provides excellent control and spin, and the combination of structure and material guarantees long lasting performance for high level players. The cross section can be engineered in a variety of ways: shaped to increase bite on the ball and spin potential, and coated to maximize wear resistance and improve string movement.

HYBRID

Hybrids are made by a combination of different strings in the mains and in the crosses of the racquet. The difference between mains and crosses lies in material, dimension, construction or shape.

In this combination the main strings primarily determine the spin potential, the control, and the overall feel and durability of the string bed. The cross strings are responsible for the comfort level, the power, and the outgoing angle that affects the trajectory of the ball.

The hybrid string setup allows players to combine the benefits of each individual string, based on its placement in the mains and crosses.

MULTIFILAMENT

Multifilament strings are complex. They are a twisted construction with hundreds or even thousands of synthetic microfilaments.

These micro-filaments can be different dimensions, shapes or materials. HEAD uses traditional round filaments and also specially engineered ribbons. The micro-filaments are assembled within a synthetic resin matrix to create a softer impact feeling or more lively touch. The strings are then coated with a thin layer of thermoplastic material, with special additives that increase wear resistance and ensure perfect realignment after every shot. Multifilament strings are very arm friendly, comfortable and powerful, providing a high level of performance.

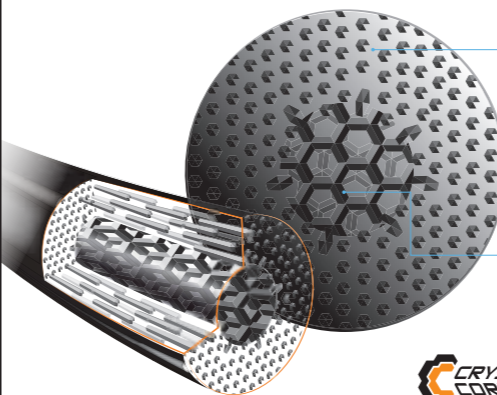

SOLID CORE WITH OUTER WRAPS

This type of string features a solid core monofilament nylon construction. It offers variable sizes, different dimensions, or can be co-extruded with other thermo-plastic materials.

The core is encased by one or more wraps of microfilaments with varying diameters or materials, and the construction is coated with one or more layers of thermo-plastic materials. Special additives are included to reduce the friction of the surface and to increase the durability.

These strings provide a crisper feel compared to multifilament strings and a more balanced combination of power and control. These strings offer a great all-around playability for a wide range of players.

DIAGNOSTIC CENTER

DIAGNOSTIC CENTER

4 in 1 Swingweight Machine/Diagnostic Center

The 4 in 1 diagnostic center is the first machine able to measure the weight, the swingweight, the twistweight (MOI) and the balance of several type of racquets: tennis, padel, squash, pickleball, racquetball.

The machine automatically sets up when the length selector is adjusted for long or short racquets. The patent pending clamp is able to hold any type of racquet horizontally or vertically, allowing different type of measurements.

The machine has also a small scale, useful to measure the lead tape weight for the customization. A calibration bar is provided to ensure the accuracy of all measurements.

**4 IN 1
DIAGNOSTIC CENTER**
